Tech growth conclave to see participants of leading global & Indian companies

Read on: [Tech Growth Conclave to see participation of leading global & Indian companies | Indore News - The Times of India](#)

Indore: Tech giants — Google, Microsoft, NVIDIA, Siemens EDA, and homegrown firms like Impetus Technologies, Appointy, and Yash Technologies — will participate in Madhya Pradesh Tech Growth Conclave 2025 to be held in Indore on April 27.

The event is expected to witness participation of leading technology companies and industry associations from India and across the globe, including ANSR, Tholons, Yotta Infrastructure, RackBank, Netlink, Infobeans, Data Ingenious Global, Kaynes Technology, HLBS Tech, Bharat Electronics Limited (BEL), Panchshil Realty, Amber Enterprises, Kedara Capital, Boston India, Primus Partners, the VLSI Society of India, and Karnataka Digital Economy Mission (KDEM).

Industry participants from the AVGC-XR industry, including Crazy Animation Studio and Purple Turtle, have also given their consent to attend the event. The Madhya Pradesh govt plans to announce major infrastructure projects, including the launch of new IT Parks, skill development centres, and startup incubators at the conclave. The inauguration of multiple Centres of Excellence, incubation hubs, software development facilities, and digital infrastructure nodes is also planned during the conclave.

Department of science and technology additional chief secretary Sanjay Dubey said, "This conclave is not just about vision — it's about action. In just two months since our last milestone, we are making tangible progress with major project initiations and the issuance of letters of allotment for new IT units."

Policy guidelines covering global capability centres (GCCs), semiconductors, AVGC-XR, and drone technologies will also be introduced during the conclave. This initiative aims to unlock sectoral potential and bolster institutional mechanisms for growth.

The event will include sectoral round-table discussions on GCCs, IT/ITES, semiconductors, drones, and AVGC-XR, bringing together senior executives from participating companies and govt stakeholders. Following these discussions, exclusive one-on-one meetings will be held between chief minister Mohan Yadav and top industry CXOs to facilitate investment clearances, address project challenges, and ensure the smooth implementation of initiatives.
